

# Bird Phazer PRO Laser

Disperse Canada geese at dusk and at night without the disturbance of shotguns, or pyrotechnics.

One of the most powerful hand held DPSS green lasers you can buy. Effective dispersal for: Canada geese, ducks, crows, gulls, vultures, cormorants, egrets, and herons.

Heavy duty metal construction; separate key for safety lock. 2" X 3" X 9"

Range: Up to 45,000 ft in darkness (approx)

Tests have shown that repeated use (3 to 6 nights, depending on species) will substantially reduce or eliminate roosts, requiring only occasional follow-up.

Efficiency is maximum between dusk and dawn as well as in cloudy weather conditions.

Power source: 6 AA batteries...1 hour continuous

Class-IIIb OEM, <30 mW

Spot Size: 4mm @ 3M

Wavelength: 532nm, Super bright green

Voltage: 3.0 - 3.3VDC @ 450 - 510 mA

This powerful green laser, unlike the red lasers, emits a visible green ray of light. You are now able to see the ray of light, not just the impact point. .

The laser system is battery powered and is in full compliance with the BRH for a class IIIb certification. System requires six AA alkaline batteries. Maximum freq 5 kHz at a 5 volt level.
