

Daddi Long Legs

Where to use: Rooftops, boat canopys, decks, booms and other open areas, A.C. units, streetlights

Target Bird: Gulls, Pigeon or larger

Bird Pressure: Light-Medium

Material: Stainless steel and Delrin Plastic

Installation: Delrin base is screwed to surface, glue-on bases available

Ease of Installation: Easy

The Daddi Long Legs bird deterrent works full-time with no motor or wind required.

It is UV stable and rust-proof to keep pest birds off your boat for years to come.

The Daddi Long Legs is in a class by itself. It's unique design deters gulls, pigeons, and other large birds, from landing in open spaces such as flat roofs or air conditioning units, as well as on street lights and other hard-to-protect areas.

How it Works

Thin, stainless steel rods rotate in the breeze and wave menacingly, interfering with birds as they attempt to land.

Easy to Install

The Delrin (plastic) base can be screwed into most surfaces and comes with a 1/4 adhesive neoprene gasket. A PVC base adapter is available for glue-on applications.

Removable

The center spindle can be easily separated from the base to gain access to an otherwise protected area.

Hard To See

The Daddi Long Legs is inconspicuous from short distances and practically invisible from 50 feet or more. It's inobtrusive design allows for use in even high visibility areas like shopping/walking promenades and parking lots.

Humane

The waving rods have plastic tips to prevent injury to birds or humans.
